Notes to the Interim Financial Statements

For the three and nine month periods ended September 30, 2015 (unaudited)

1. Corporate information:

Kaisen Energy Corp. (the "Company" or "Kaisen") is a Calgary based energy company primarily focused on heavy oil development and production in Saskatchewan. The Company was incorporated in Canada on November 6, 2012. The Company's principal place of business is located at 312, 522 – 11th Avenue S.W. Calgary, Alberta, Canada, T2R 0C8.

2. Basis of presentation

Statement of compliance

These unaudited condensed interim financial statements (the "financial statements") for the three and nine month periods ended September 30, 2015 (the "Quarter" and "Year to Date" respectively) have been prepared in accordance with International Accounting Standards ("IAS") 34 Interim Financial Reporting using accounting policies aligned with International Financial Reporting Standards ("IFRS"). The financial statements do not include all of the information required for annual financial statements and should be read in conjunction with the audited financial statements for the year ended December 31, 2014, which have been prepared in accordance with IFRS.

These financial statements were authorized for issue by the Board of Directors on December 18, 2015.

3. Significant Accounting Policies

Future Accounting Policy Changes

In May 2014, the IASB issued IFRS 15 "Revenue from Contracts with Customers", which replaces IAS 18 "Revenue", IAS 11 "Construction Contracts" and related interpretations. The standard is required to be adopted either retrospectively or using a modified transition approach for fiscal years beginning on or after January 1, 2018, with earlier adoption permitted. The Company is currently evaluating the impact of the standard on Kaisen's financial statements. In July 2014, the IASB completed the final elements of IFRS 9 "Financial Instruments." The Standard supersedes earlier versions of IFRS 9 and completes the IASB's project to replace IAS 39 "Financial Instruments: Recognition and Measurement." IFRS 9, as amended, includes a principle-based approach for classification and measurement of financial assets, a single 'expected loss' impairment model and a substantially-reformed approach to hedge accounting. The Standard will come into effect for annual periods beginning on or after January 1, 2018, with earlier adoption permitted. The Company is currently evaluating the impact of the standard on its financial statements.

During the Quarter, the Company capitalized general and administrative expenses in the amount of \$67,497 (\$67,497 for the same period in 2014) and capitalized share based compensation expense in the amount of \$14,523 (nil for the same period in the prior year), relating to development activities. Future development costs associated with proved and probable undeveloped reserves of \$84,546,000 (\$84,546,000 at December 31, 2014) are included in the depletion calculation net of salvage values of \$1,634,000 (\$1,624,000 at December 31, 2014) for the Quarter. No other costs have been included or excluded from property plant and equipment in the determination of depletion and depreciation expense.

Management reviewed the carrying amounts of property and equipment assets for indicators of impairment at September 30, 2015 and determined that no impairment adjustment was required.

6. Bank Debt

As at September 30, 2015, the Company had a banking facility of \$11,100,000 comprised of a \$9,100,000 revolving operating facility and a \$2,000,000 bridge facility. The bridge facility, which was previously due and payable in full on May 31, 2015 concurrent with the next borrowing base review, was extended into December 2015 at which time the unutilized bridge facility was eliminated and the revolving operating facility was reduced to \$5,500,000. The next borrowing base review has been scheduled for January 31, 2016.

The operating facility and bridge facility are payable in full on demand by the lender, and the lender may terminate the availability thereof (including any undrawn portion) at any time without notice, therefore at September 30, 2015 the facilities have been classified by the Company as a current liability on the statement of financial position. Prime-based loans are available through the operating facility at prime plus 1.25% per annum.

The facility is subject to a financial covenant wherein the working capital ratio at no time shall fall below 1.00:1. Working capital is defined under the lending agreement to include current assets plus any undrawn availability under the operating and bridge facilities, less current liabilities less any amount currently drawn under the Facilities (if applicable). At September 30, 2015, the Company was compliant with its financial covenant with a working capital ratio of 1.23. A demand debenture on all the assets of the Company has been provided as collateral for these facilities.

At September 30, 2015, the Company had total bank debt of \$4,213,940 (\$2,277,581 at December 31, 2014) and total net debt (which includes net working capital) of \$4,929,727 (\$3,381,845 at December 31, 2014).

Finance charges	77,011	74,543	224,271	222,127

8. Asset Retirement Obligations

The total future asset retirement obligations were estimated by management based on the expected cost to abandon and restore its net ownership interest in well sites and facilities and the estimated timing of the costs to be incurred in future periods. The Company has estimated that the total undiscounted amount of cash flows required to settle its asset retirement obligations at September 30, 2015 was \$8,469,412 which will be incurred over the next 10-15 years with the majority of costs incurred between 2018 and 2024. In the prior year, the Company reduced the assumed risk free interest rate from 2.50% to 2.22%, reflecting the lower Canadian interest rates at year end. Reserve life assumptions were also modified to reflect the estimated reserves life of the Company's wells. An inflation rate of 2.0% to inflate the estimated future costs to abandon the wells remained unchanged. A reconciliation of the changes to the asset retirement obligations during the periods were as follows:

These marketing companies remit amounts to Kaisen typically on or about the 25th day of the month following the production month. 100% of outstanding accounts receivable at September 30, 2015 are from one of these marketing companies of which the full balance was received subsequent to the Quarter end. Kaisen did not have any other customers from which it had outstanding accounts receivable greater than 10% of the total outstanding balance at September 30, 2015. As at September 30, 2015, the Company is confident in the collectability of its' receivables and therefore has not recorded an allowance for doubtful accounts.
